

The Wickford Action Group

www.WickfordActionGroup.org.uk

Against the over-development of Wickford.

There are plans in various stages for building **1,500*** more homes in Wickford, and possibly double that!

Many of these plans do not offer existing residents any benefits, whilst at the same time they would give rise to other problems such as more traffic congestion, unsightly appearance, and in some cases, a potential flooding hazard.

There would also be an extra burden on the already overstretched resources such as doctors, dentists, schools, shops etc.

We **do** want to see improvements to the town, but not at the expense of the above.

We are an independent, non-political group of Wickford residents anxious to ensure that the proposed developments under the **Wickford Town Centre Masterplan**, whilst offering definite improvements, are not implemented regardless of cost or damage to the town or the environment.

Have a look at the information on our website at:
